Inventive step (IS)	Claims	1-3	YES
	Claims	NONE	NO
Industrial applicability (IA)	Claims	1-3	YES
	Claims	NONE	NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: JP 62-072902 U (11 May 1987)

D2: JP 62-143603 U (10 September 1987)

Novelty and Inventive Step

Claim 1 relates to a nozzle for vacuum sealing a plastic bag comprising an embossing part formed on the peripheral surface of the nozzle, and a plurality of break lines, wherein the nozzle is made of a heat sealable material.

D2, which is considered the closest prior art to claim 1, relates to a nozzle having an opening part formed at the peripheral surface thereof, and an embossing part formed at the inner peripheral surface thereof.

The embossing part of claim 1 corresponds to the embossing part of D2, but the plurality of break lines of claim 1 are not described in D2, nor are obvious from the prior art. Accordingly, a person skilled in the art would not readily invent the nozzle of claim 1 by using the teaching of D2.

Therefore, claim 1 and claims 2 and 3 which are dependent on claim 1 meet the requirements of PCT Article 33(2) and 33(3).

Industrial Applicability

The present invention relates to a nozzle for vacuum sealing a plastic bag. Therefore, claims 1-3 meet the requirement of PCT Article 33(4).
